PARTICLE COUNTER INCL. CALIBRATION CERTIFICATE

PCE-PQC 30EU

- **Particle measurement in real time**
- **Internal measured value memory**
- **Easy construction**
- **Remote access via Ethernet or Wifi (optional)**
- **Gravimetric filter**
- **Optional temperature / humidity sensor**

The particulate matter measuring device PCE-PQC 3xEU series is the most advanced particulate matter measuring device on the market. Integration into a building automation and clean room management system is easily possible via Ethernet or (optionally) Wireless 802.11 b / g, RS485 or RS232. The particulate matter gauge measures 6 user-selectable particle size channels and (optional) temperature and relative humidity. This particulate matter meter stores up to 45,000 measured values ⍰⍰with time stamp.

The particulate matter meter can be remotely controlled and monitored via a web browser. The fine dust measuring device is a mounting device, which is characterized by the rod or wall mounting on the one hand and the far-reaching functions on the other hand as very robust and versatile.
